ania

DESIGN LAB

what is **ania**
DESIGN LAB

a **content-based** development startup focusing on **maximizing learning opportunities**

who are behind **ania** DESIGN LAB

a team of **multidisciplinary designers** and **software developers**

why we built ania
DESIGN LAB

Disaster Preparedness has been introduced in the **K-12 curriculum** in the Philippines

the initiatives and current practices for disaster preparedness are **limited**

the initiatives and current practices for disaster preparedness are **limited**

why?

participants and students are not able to see the effects of disasters first-hand

they are not able to make
critical decisions that are crucial
during disaster situations

design challenge #1

how might we be able to make people **experience an extreme disaster situation** and **show its effects**

design challenge #2

how might we enable **active participation** during disaster situation **without putting people in danger**

our solution

a **disaster preparedness simulator** (dps)

what is dps

an **immersive learning experience** for disaster preparedness **using virtual reality**

what is dps

integrates **disaster elements** and **decision making** for better learning opportunities

what now

play test and experience latest version of the product and **get feedback** from the people who will be using it

feedback

I LIKE… things you liked/enjoyed during the play test

I WISH… things you wish you saw/ experienced during the play test

WHAT IF… things you can suggest so we can improve the simulator experience
